SECTION III - Responding to a Low Glucose Level (Hypoglycemia)

Below are common symptoms that may be observed when glucose levels are <u>low</u>.

Reminder: These symptoms can change and some students may not display any symptoms.

Parents **may** choose to circle their child's most common symptoms.

Symptoms of a Low Glucose Level (Hypoglycemia)		
Shaky Weak Sweaty Rapid heartbeat Dizzy Hungry Headache Lack of coordination Seizure Tiredness Loss of consciousness Pale Confusion Irritability/Personality changes Continuous Glucose Monitor (CGM) alarm/arrows Other:		
Actions for Treat	ng Hypoglycemia	
Treatment for Mild to Moderate Hypoglycemia	Treatment for Severe Hypoglycemia	
Notify School Nurse or Designated School Personnel as soon as you observe symptoms. If possible, check glucose level via finger stick. Do NOT send student to office alone! Treat for hypoglycemia if glucose level is: less than or less than with symptoms. WHEN IN DOUBT, ALWAYS TREAT FOR HYPOGLYCEMIA AS SPECIFIED BELOW.	Student is: ✓ Unconscious ✓ Having a seizure ✓ Having difficulty swallowing Follow Emergency Steps 1. Administer Glucagon 2. Call 9-1-1 3. Activate MERT (Medical Emergency Response Team)	
"Rule of 15"	Administer Glucagon	
 □ Treat with 15 grams of quick-acting glucose (4 oz. juice or 3-4 glucose tabs) ○ OR □ Treat with 30 grams of quick-acting glucose (8 oz. juice or 6-8 glucose tabs) if glucose level is less than □ Wait 15 minutes. Recheck glucose level. □ Repeat quick-acting glucose treatment if glucose level is less than mg/dL. □ Contact the student's parents/guardians. Then: □ If an hour or more before next meal, give a snack of 	☑ Stay with student, protect from injury, turn on side ☑ Do not put anything into the student's mouth ☐ Suspend or remove insulin pump (if worn) ☑ Administer Glucagon Per MAA Form: ☐ Injection, Glucagon/Glucagen/Gvoke PFS: ☐ 0.5 mg ☐ 1.0 mg ☐ Auto-Injection, Gvoke HypoPen: ☐ 0.5mg/0.1ml ☐ 1mg/0.2ml ☐ Nasal, Baqsimi Glucagon Nasal Powder: ☐ 3mg ☐ Implement Medical Emergency Response:	
 If an hour or more before next meal, give a snack of protein and complex carbohydrates If mealtime and no difficulty swallowing, monitor and allow student to eat lunch while waiting to recheck glucose level. Once glucose level is greater than and student has finished eating lunch, give insulin to cover meal carbs only. 	 ✓ Take AED and any emergency medical supplies to location; ✓ Inform Central Administration of Emergency; ✓ Contact parents; Meet them in the parking lot; ✓ Meet the ambulance/direct traffic; ✓ Provide copy of student medical record to EMS; ✓ Control the scene; ✓ Document emergency and response on Emergency Response/Incident Report form; ✓ Conduct debriefing session of incident and response following the event.

SECTION IV - Responding to High Glucose Levels (Hyperglycemia)

Below are common symptoms that may be observed when glucose levels are <u>high</u>.

Reminder: These symptoms can change and some students may not display any symptoms.

Parents **may** choose to circle their child's most common symptoms.

Symptoms of a High Glucose Level (Hyperglycemia)		
Increased thirst Increased urination Tiredness Increased appetite Decreased appetite Blurred Vision Headache Sweet, fruity breath Dry, itchy skin Achiness Stomach pain/nausea/vomiting Seizure Loss of consciousness/coma Continuous Glucose Monitor (CGM) alarm/arrows Other:		
Actions for Treating Hyperglycemia		
Treatment for Hyperglycemia Treatment for Hyperglycemia Emergency		
Notify School Nurse or Designated School Personnel as soon as you observe symptoms.	Call 9-1-1 Activate Medical Emergency Response	
☐ For glucose level less than 300: ✓ If not mealtime – do not give correction dose of	Call 9-1-1 if severe symptoms are present.	
insulin, offer water, return to normal routine if feeling well	Severe symptoms may include: ✓ Abdominal pain	
✓ If mealtime, give insulin as prescribed (see Section I, Routine Management, Insulin Administration)	✓ Nausea/Repetitive Vomiting	
☐ For glucose level 300 or greater:	✓ Change in level of consciousness	
✓ If mealtime, give insulin as prescribed (see Section I, Routine Management, Insulin Administration)	✓ Lethargy	
✓ Have student check ketones	☐ Implement Medical Emergency Response:	
☐ Positive Ketones:✓ Call parent/guardian	 ✓ Take AED and any emergency medical supplies to location; 	
■ Trace or Small - attempt to flush, remain in school	✓ Inform Central Administration of Emergency;	
if feeling well and no vomiting	✓ Contact parents; Meet them in the parking lot;	
 Moderate or Large - parent pick-up immediately 	✓ Meet the ambulance/direct traffic;	
 ✓ Give 8-16 oz. of water hourly ✓ No exercise, physical education, or recess ✓ Recheck ketones at next urination 	 ✓ Provide copy of student medical record to EMS; 	
	✓ Control the scene;	
 ✓ If on pump, check infusion set/pump site: ■ Is tubing disconnected? ■ Is there wetness around the pump site, etc.? 	 Document emergency and response on Emergency Response/Incident Report form; 	
Negative Ketones:	✓ Conduct debriefing session of incident and	
✓ If not mealtime - offer water, return to normal routine if feeling well	response following the event.	
If no ketone strips are available:		
✓ Treat as Positive Ketones		
✓ Request strips from family
